EDUCATION

2024 - 2027
PhD in Artificial Intelligence
Universidad Autónoma de
Zacatecas

2021 - 2022
MSc in Artificial Intelligence
INFOTEC

2012 - 2017
Computer Science Eng.
Instituto Politécnico Nacional

LANGUAGES

Spanish - Native
English - C1
French - B2
Catalan - A2

SKILLS

Python
Deep Learning
Machine Learning
Statistical Analysis
Computer Vision
Amazon Web Services
MLFlow
Docker
Pytorch

ABOUT ME

Computer Science Engineer with a Master's in AI and a current PhD candidate. I specialize in machine learning, data science, applied AI, and robotics. Experienced in Python, AWS, MLFlow, deep learning, computer vision, NLP, and robotic systems using ROS and sensor integration.

WORK EXPERIENCE

ASSISTANT PROFESSOR AND RESEARCHER

2023- 2025 | Instituto Politécnico Nacional

I had the opportunity to focus on developing advanced machine learning and deep learning models applied to computer vision.

SENIOR DATA SCIENTIST

2022 - 2023 | SoFi

Responsible for developing advanced models that predict and mitigate credit risk using cutting-edge statistical methods and principles of fair and explainable AI.

SENIOR DATA SCIENTIST

2020 - 2022 | TrackChain

Built the first versions of the core intelligent algorithm that makes TrackChain's platform run. Also, I was in charge of pipelines, data engineering infrastructures and algorithms to assure data quality for the different teams.

SENIOR RESEARCHER ENGINEER

2019 - 2021 | Barcelona Supercomputing Center

Senior Research Engineer at the High Performance Artificial Intelligence (HPAI) group.

Responsible of the development of applied deep learning, machine learning and data science research projects, working close with PhD students and researchers to implement multiple technologies, using diverse infrastructure and software methodologies to their research.
